Unlimited flexibility!

HDMI® is extremely common, that is why, our new DockingStation is equipped with two of those, along side with the classic VGA. As to the positioning and alignment, right, left, back or forth, does not matter anymore, since top and bottom play no role and thanks to the longer nylon coated cable, the setup can now be arranged without restrictions – as said... Universal!

More Options

DockingStations not only offer users a way to quickly transition from one working environment to another via a single cable, they can also add additional functionality and capabilities to notebook designs that are increasingly slim and with limited interface option.

USB Type-C®

The Type-C® connection offers incredible versatility. It combines data transmission, video output and power in a single, compact port. The integration of USB Type-C ® makes the connection even more practical, as it has a twist-proof connection as its physical feature - making it a truly universal connection.

Easy connection - multiple benefits

Perfectly combines high-quality appearance and efficient technology with a very compact size. The premium aluminium DockingStation does not only look good but also offers high comfort while using. This solution is suited for any location such as private or office areas.
